Indian Equity Fund - Z
ISIN: LU0360485733, Base Currency: USD
A fund of Morgan Stanley Investment Funds
The fund is managed by MSIM Fund Management (Ireland) Limited, part of the Morgan Stanley group.

OBJECTIVES AND INVESTMENT POLICY

Objective
- Long term growth of your investment

Main Investments
- The fund invests principally in company shares.

Investment Policy
- To invest in companies based in or carrying out most of their business in India.
- The fund takes into consideration environmental, social, and governance factors in its investment process.
- The Fund will measure its performance against the MSCI India (Net) Index (the "Benchmark"). The Fund is actively managed and is not designed to track the Benchmark. Therefore, the management of the Fund is not constrained by the composition of the Benchmark.

Other Information
- The fund may also invest part of its assets in companies listed on Indian stock exchanges which are not based in, or do not carry out the majority of their business in, India.
- Income will be included in the value of your shares.
- The fund may also invest part of its assets in other investments, which seek to generate a similar return to company shares without direct ownership of the company.
- There are higher costs involved in buying and selling shares in India. These costs reduce the value of your investment but are not included in the Ongoing Charges figure below.

Buying and selling shares
- Investors may buy and sell shares on any day that is a business day in both Luxembourg and India (being a day on which commercial banks, at both the Bombay Stock Exchange (BSE) and the National Stock Exchange of India (NSE) are open).

RISK AND REWARD PROFILE

Lower risk  Higher risk
Potentially lower rewards  Potentially higher rewards
1  2  3  4  5  6  7

The risk and reward category shown is based on historic data.
- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in shares of Indian companies and the fund's simulated and/or realised return has experienced high rises and falls historically.
- The fund may be impacted by movements in the exchange rates between the fund's currency and the currencies of the fund's investments.

This rating does not take into account other risk factors which should be considered before investing, these include:
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- There may be an insufficient number of buyers or sellers which may affect the funds ability to buy or sell securities.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.
CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
