**RISK AND REWARD PROFILE**

<table>
<thead>
<tr>
<th>Lower risk</th>
<th>Higher risk</th>
</tr>
</thead>
<tbody>
<tr>
<td>Potentially lower rewards</td>
<td>Potentially higher rewards</td>
</tr>
</tbody>
</table>

The risk and reward category shown is based on historic data.
- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in money market securities and the fund's simulated and/or realised return has experienced low rises and falls historically.

This rating does not take into account other risk factors which should be considered before investing, these include:
- The value of bonds are likely to decrease if interest rates rise and vice versa.
- Issuers may not be able to repay their debts, if this happens the value of your investment will decrease. This risk is higher where the fund invests in a bond with a lower credit rating.
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
**CHARGES**

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

<tbody>
<tr>

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

The exit charge shown is a maximum figure. In some cases you might pay less, you can find this out from your financial adviser.

The ongoing charges figure is an estimate based on the expected annual charges. This figure may vary from year to year. It excludes almost all costs of dealing in the funds underlying investments.

The fund may charge a fee of up to 2.00% on redemptions if it feels other shareholders will suffer as a result of the cost of the transaction. This fee will be retained by the fund for the benefit of all shareholders.

For more information about charges, please see the General Charges and Expenses section of the prospectus.

The ongoing charges figure incorporates a fee reduction by way of a waiver. This waiver is at the discretion of the Management Company and may be subject to change without notice.

**PAST PERFORMANCE**

- Past performance is only a guide and does not guarantee future performance.
- Past performance has been calculated after the deduction of ongoing charges, as described above, but not the deduction of entry or exit charges.
- The fund was launched on 14 June 2013 following a transfer of assets from the equivalent fund of Morgan Stanley Funds p.l.c.
- Performance prior to 14 June 2013 relates to the equivalent share class of Morgan Stanley Funds p.l.c. The 2013 performance figure therefore combines performance of both Morgan Stanley Funds PLC and Morgan Stanley Liquidity Funds.
- Past performance has been calculated in EUR.
- The performance of the fund is not compared to a benchmark.
