

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Carmignac Emergents

Unit A EUR Acc (ISIN: FR0010149302)

This UCITS is managed by Carmignac Gestion.

Objectives and investment policy

The key features of the UCITS are as follows:

- The Fund aims to outperform its reference indicator over a period exceeding five years.
- The reference indicator is the MSCI EM NR (USD) calculated with net dividends reinvested (Morgan Stanley Emerging Markets index).
- At least 60% of the Fund's net assets are exposed to international equity markets, with a significant allocation to emerging countries, through direct security investments or through derivatives. The assets may also consist of fixed income securities, debt securities or money market instruments denominated in euro or other currencies as well as variable rate bonds. Up to 40% of the assets may be invested in fixed income products for the purpose of risk diversification in the event of expected negative movements in equities. The Fund may also invest up to 30% of its net assets in Chinese domestic securities.
- The decision to buy, hold or sell debt securities will not automatically and solely depend on their rating but also an internal analysis based mainly on return, credit rating, liquidity and maturity criteria.
- The manager may use Relative Value strategies as performance drivers, looking to take advantage of the relative value between different instruments.
- The Fund has a socially responsible management approach, and integrates environmental, social and governance criteria in the selection of securities.

Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period. Its aim is to help investors understand the uncertainty attached to gains and losses that may have an impact on their investment.

- Historical data used to calculate this indicator may not be a reliable indication of the future risk profile of the Fund.
- The risk category of this Fund is not guaranteed and may change over time.
- Category 1 does not mean the investment is risk-free.
- This Fund is placed in category 6 owing to its exposure to emerging market equities.
- The Fund's capital is not guaranteed.

Other information:

- The Fund uses futures and options for hedging or arbitrage purposes, and/or to expose the portfolio to the following risks (directly or via indices): currencies, bonds, equities (all categories of capitalisation), ETFs, dividends, volatility, variance (the latter two categories for up to 10% of net assets) and commodities (up to 20% of assets). The derivatives available are options (vanilla, barrier, binary), futures and forwards, swaps (including performance) and CFDs (contracts for difference) on one or more underlyings. Overall exposure to derivatives is controlled by combining expected gearing of 2 with the Fund's VaR limit, which must not be more than double the reference indicator's.
- Up to 10% of the net assets may be invested in contingent convertible bonds ("CoCos"). CoCos are regulated subordinated debt instruments that are complex, but consistent in nature.
- The Fund may invest up to 10% of its net assets in units or shares of investment funds.
- This Fund may not be suitable for investors planning to withdraw their investment within five years.
- Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 18:00 CET/CEST and are executed on the next business day using the previous day's NAV.
- This unit is an accumulation unit.

Risks to which the Fund may be exposed, which could lead to a fall in the net asset value and to which the indicator gives too little consideration:

- Counterparty risk: the Fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations.
- For more information on risks, please refer to the Fund prospectus.

Charges

The charges paid are used to cover the costs of running the fund, including the costs of marketing and distributing units. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	4.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.99%
Charges taken from the fund under certain specific conditions	
Performance fee	
20.00% of the outperformance if the performance is positive and exceeds that of the reference indicator (MSCI EM NR) since the beginning of the year. Performance fee invoiced for the last financial year: 0.05%	

Entry and exit charges shown are the maximum applicable and are paid to the distributor. Lower fees may apply in some cases; contact your financial advisor or distributor to find out the actual amount.

Ongoing charges are based on the expenses for the last financial year ended 31 December 2017. They may vary from year to year and do not include performance fees or transaction costs (except in the case of entry/exit charges paid by the Fund when buying or selling units of another collective investment vehicle).

For more information on fees, charges and performance fee calculation methods, please refer to the "Fees and expenses" section of the prospectus, available on the website: www.carmignac.com

Past performance

■ Performance of the UCITS
■ Performance of reference indicator: MSCI EM NR

- Past performance is not a reliable indication of future results.
- Charges are included in the performances shown.
- This Unit was created in 1997.
- Performances shown are calculated in EUR.
- Until 31/12/2012, the reference indicators' equity indices were calculated ex-dividend. Since 01/01/2013, they have been calculated with net dividends reinvested and their performances have been presented using the chaining method.
- The fund investment policy is not benchmarked, the index provided is a reference indicator.
