

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Global Balanced Income Fund - ZHR (GBP)

ISIN: LU1268547731, Base Currency: GBP

**A fund of Morgan Stanley Investment Funds**

The fund is managed by Morgan Stanley Investment Management (ACD) Limited, part of the Morgan Stanley group.

### OBJECTIVES AND INVESTMENT POLICY

#### Objective

- To generate regular income and long term growth of your investment.

#### Main Investments

- Company shares (including Real Estate Investment Trusts), fixed income securities (eg. bonds), derivatives of shares and fixed income securities and commodity linked notes

#### Investment Policy

- The fund allocates between asset classes, regions and countries on a tactical basis to generate income. The fund may invest in emerging markets and lower quality bonds.

#### Other Information

- The Fund may invest in derivatives (including commodity linked derivatives), financial instruments which take their value indirectly from other assets. They rely on other companies to fulfill contractual obligations and carry more risk. Refer to the prospectus ('Use of Derivatives' section) for more details.
- Fees and expenses may be paid out of capital and capital itself may be incorporated in the distribution payment. This will reduce the capital available for investment and erode capital value.
- This is a currency hedged share class. It aims to reduce the impact on your investment of movements in the exchange rate between the fund currency and the share class currency.
- Income may be paid in cash or additional shares.

#### Buying and selling shares

- Investors may buy and sell shares on any Luxembourg business day.

### RISK AND REWARD PROFILE

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in a range of assets with different levels of risk and the fund's simulated and/or realised return has experienced high rises and falls historically.
- The fund may be impacted by movements in the exchange rates between the fund's currency and the currencies of the fund's investments.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The value of bonds are likely to decrease if interest rates rise and vice versa.
- The value of financial derivative instruments are highly sensitive and may result in losses in excess of the amount invested by the Sub-Fund.
- Issuers may not be able to repay their debts, if this happens the value of your investment will decrease. This risk is higher where the fund invests in a bond with a lower credit rating.
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- There may be an insufficient number of buyers or sellers which may affect the funds ability to buy or sell securities.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.
- The derivative strategy aims to increase the income paid to investors, but there is potential for the fund to suffer losses.

## CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

<b>Entry charge</b>	1.00%
<b>Exit charge</b>	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

<b>Ongoing charges</b>	0.99%
------------------------	-------

Charges taken from the fund under certain specific conditions

<b>Performance fee</b>	Not applicable
------------------------	----------------

The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31st December, 2017. This figure may vary from year to year. It excludes almost all costs of dealing in the fund's underlying investments.

The fund may charge a fee on purchases, sales or switches if it feels other shareholders will suffer as a result of the cost of the transaction. This fee will be retained by the fund for the benefit of all shareholders.

For more information about charges, please see the Charges and Expenses section of the prospectus.

## PAST PERFORMANCE

- Past performance is only a guide and does not guarantee future performance.
- Past performance has been calculated after the deduction of ongoing charges, as described above, but not the deduction of entry or exit charges.
- This share class was launched in 2015. The fund was launched in 2014.
- Past performance has been calculated in GBP.
