Global Buy and Hold 2020 Bond Fund - AX

ISIN: LU1506359188, Base Currency: EUR

A fund of Morgan Stanley Investment Funds

The fund is managed by Morgan Stanley Investment Management (ACD) Limited, part of the Morgan Stanley group.

OBJECTIVES AND INVESTMENT POLICY

Objective

- To generate income from your investment over a 4 year period expiring in 2020.

Main Investments

- Fixed income securities (eg. bonds)

Investment Policy

- The fund is designed to be held to maturity and investors should be prepared to remain invested until bonds mature in 2020. The fund features three distinct phases
 - The Asset Gathering Period**
Short term Fixed Income Securities, such as money market instruments or Short-Term Money Market Funds and Money Market Funds
 - The Principal Investment Period**
Bonds issued in all currencies and locations by governmental agencies and private businesses. The fund may invest in emerging markets and lower quality bonds. Lower quality bonds are defined as being rated lower than BBB- by S&P or Baa3 by Moody's. These investments will mature in approximately 4 years from the start of the Principal Investment Period.
 - The Post Investment Period**
Short term Fixed Income Securities, such as money market instruments or Short-Term Money Market Funds and Money Market Funds.
This fund may not be appropriate for investors who plan to withdraw their money within 4 years.

Other Information

- The fund may also invest in other fixed income securities that do not meet the above criteria, for example higher rated bonds.
- The fund may invest in derivatives, financial instruments which take their value indirectly from other assets. They rely on other companies to fulfill contractual obligations and carry more risk. Refer to the prospectus ('Use of Derivatives' section) for more details.
- Income will be declared quarterly at the discretion of the Directors and may be paid in cash or additional shares. The Directors expect to retain certain amounts from net investment income to meet certain costs. Refer to the prospectus ('Dividend Policy' section) for more details.

Buying and selling shares

- The Fund is now closed for new subscriptions. Investors may sell shares on any Luxembourg business day.

RISK AND REWARD PROFILE

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in fixed income securities and the fund's simulated and/or realised return has experienced medium rises and falls historically.
- The fund may be impacted by movements in the exchange rates between the fund's currency and the currencies of the fund's investments.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The value of bonds are likely to decrease if interest rates rise and vice versa.
- The value of financial derivative instruments are highly sensitive and may result in losses in excess of the amount invested by the fund.
- Issuers may not be able to repay their debts, if this happens the value of your investment will decrease. This risk is higher where the fund invests in a bond with a lower credit rating.
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- There may be an insufficient number of buyers or sellers which may affect the funds ability to buy or sell securities.
- Investment in Fixed Income Securities via the China Interbank Bond Market may also entail additional risks, such as counterparty and liquidity risk.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.

CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	4.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.74%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	Not applicable
------------------------	----------------

The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31st December, 2017. This figure may vary from year to year. It excludes almost all costs of dealing in the fund's underlying investments.

The fund may charge a fee on purchases, sales or switches if it feels other shareholders will suffer as a result of the cost of the transaction. This fee will be retained by the fund for the benefit of all shareholders.

For more information about charges, please see the Charges and Expenses section of the prospectus.

PAST PERFORMANCE

- Past performance is only a guide and does not guarantee future performance.
- Past performance has been calculated after the deduction of ongoing charges, as described above, but not the deduction of entry or exit charges.
- The fund was launched in 2016.
- Past performance has been calculated in EUR.
