The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.

- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The Fund is in this category because it invests in a range of assets and the fund's simulated and/or realised return has experienced high rises and falls historically.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The Fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the Fund to financial loss.
- There are additional risks associated with investing in infrastructure.
- There may be an insufficient number of buyers or sellers which may affect the Fund's ability to buy or sell securities.
- There are additional risks associated with investing in real estate.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.
